PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building scalable React and Next.js applications for fintech and SaaS products. Proven expertise in component-based architecture, Server-Side Rendering (SSR), REST API integration, and performance optimization. Delivers maintainable, ATS-friendly solutions that bridge high-fidelity design with robust frontend systems in Agile environments.

PROFESSIONAL EXPERIENCE

Frontend Developer

Remote – Vienna, Austria

Jobchain®

August 2024 – May 2026

- Architected and delivered a comprehensive internal Control Panel comprising 10+ modular dashboards, including granular Role-Based Access Control (RBAC), feature flag management, task orchestration, and user administration, empowering non-technical teams with self-service platform governance capabilities.
- Engineered a dedicated Compliance Dashboard with 7 specialized modules for transaction monitoring, real-time alerts, entity risk scoring, and country-level regulatory reporting, integrating KYC/KYT data pipelines to support audit readiness and financial oversight.
- Executed a critical migration of Next.js (to v16) and React (to v19) within a 3-day sprint, resolving long-standing dependency conflicts and reducing initial page load time by an estimated 30%, resulting in markedly faster perceived performance and smoother navigation across the pre-launch web application.
- Architected and implemented a comprehensive navigation refactor for the core Wallet module using Next.js App Router, eliminating redundant renders and improving perceived page transition speed by approximately 40%, delivering a more fluid single-page application (SPA) experience.
- Integrated end-to-end payment and identity verification flows (Stripe, RevenueCat, Sumsb KYC) in cross-functional collaboration, strengthening checkout security and reducing potential support tickets related to onboarding and transactions.

Full Stack Developer

Colombia

Tucán Marketing Digital

January 2024 – April 2024

- Diagnosed and resolved critical rendering bottlenecks across 12 client websites, reducing production runtime errors by 30% through systematic debugging and performance profiling of frontend assets and server-side scripts.
- Executed full-cycle website migrations and structural overhauls for 12 client properties, implementing technical SEO best practices and responsive design patterns that drove a 20% increase in organic search traffic within three months.

Full Stack Developer (Team Lead)

Remote

Henry Bootcamp

February 2023 – July 2023

- Led a 5-person frontend team in delivering a full-stack e-commerce platform (PostgreSQL, Express, React.js, Node.js) featuring product catalog, payment processing, and admin dashboard within a simulated agile environment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Redux Toolkit, SWR, Tailwind CSS, Express

Fintech & Security: Stripe, RevenueCat, Sumsb KYC, Role-Based Access Control (RBAC), OTP/MFA

Tools & Methodologies: Git, GitLab, Figma-to-Code, Modular Architecture, Agile (Scrum), Jira

Core Competencies: Performance Optimization, Server-Side Rendering (SSR), Responsive Design, Code

Splitting, Core Web Vitals

EDUCATION

B.S. in Systems Engineering
Full Stack Web Development

FESNA (In Progress)
Henry Bootcamp | 2023

CERTIFICATIONS & LANGUAGES

English: B2 Upper Intermediate (EF SET Certificate)
React – The Complete Guide
Introduction to HTML5 / CSS3
React Native: Native Apps for iOS and Android
